'Different' is interesting!

The ALA Multicultural Theater Project "TSUKUTTE-TSUNAGARU!"

The Intercultural Theater Project is a project created by both Japanese and foreigners. We started in 2008 and this is our third year. By working together towards the same goal a definite bond has developed between the participants who themselves are very different and unique. This project which is three months of workshops and rehearsals gives a glimpse of what it means to be foreigner in Japan and how they view this country. Don't miss out on seeing their rich and unique play, itself a triumph over intercultural differences and language barriers!!
